DFM longline

DFM Longline was created in 1996 by three of Scandinavia’s leading fishing gear suppliers. These shareholders have over 175 years combined experience in the industry, and many decades of specialist knowledge of longlining.

DFM swivel gear

DFM 9.2mm swivelled longlines have been developed for fishermen who require the extra strength and durability of 9mm gear.

Unique stopper system

Complete stainless steel rings are pressed onto the mainline; these do not damage the rope fibers as much as other systems, giving higher breaking strength and longer life. Plus, with this system swivels can be mounted onto 3-strand rope, which is better suited to longlining. 4-strand is available too, if preferred.

Other features

Specially profiled sleeves that cannot be bent or crushed in normal use; welded swivel eyes for extra strength; all components are stainless steel for ling life; ropes are manufactured by DFM shareholders to guarantee best quality.

DFM gear features:

- single or double stopper mounting
- excellent swivel action
- 3-strand mainline for strength and easy handling
- unique stopper system for improved breaking strength
- super strong profiled sleeve
- welded swivel eyes
- choice of top quality mainlines
- tested and proven at sea

DFM will also build your gear specially to suit your needs.

Replacement swivels & accessories

Replacement swivels are available, with open eye end for easy replacement.

We carry two types of mainlines with DFM swivel gear:

- 50/50 standard
  50% Polyester & 50% Polysteel, 3,200 lb.+ breaking strength
- Polyester
  100% Polyester, 3,800 lb.+ breaking strength

Both types of swivel DFM longline are available with either 42” or 48” spacing in soft, medium, or medium-firm lays depending on your application.

DFM longline

DFM longline is available in 3 or 4 strand: tarred, clear coated, or color coated.

Aqualine Plus groundline
This high-quality twisted nylon groundline is a favorite with commercial longliners. Aqualine Plus is strong, coils well, and has the elasticity required for deep water fishing. Made with tough nylon filament from Allied Signal, Aqualine Plus has superior abrasion resistance and wet strength. Sold in 1,800’ coils; available tared. Custom sizes by special order. Made in America.

Manline Himan
Himan is made by ManHo, a rope manufacturer in Korea. Consistent quality and competitive price make this an excellent buy for longliners. Himan is constructed of a twisted co-polymer polypropylene with a leaded core; it has good lay and coiling ability, and better strength and abrasion-resistance than regular polypropylene rope. Sold in 1,800’ coils; grey with orange and blue tracers.

With approximately 8 mile visibility on a clear night with standard clear lens. Strobe, #MF1112; replacement top, #MF1112T; replacement lens, #MF1112L

**Longline floats**
Double-ear longline float, 4.75”. #7110020
**Polyform LD series buoys**

Low Drag (LD) buoys have less than 20% of the drag of standard round buoys, which means faster, safer pick-ups, and less strain on both the crew and the gear. The patented rib design and unique shape allow the buoy to skip along the surface of the water rather than digging in as standard buoys do.

The LD also dramatically reduces gear loss under the most extreme ice conditions. Of course, LD buoys have all the time-proven Polyform features: one-piece construction, reinforced ribbed ropehold eye, unique vinyl valving system, and the Polyform limited lifetime guarantee.
